GRIN-Global Updater

Revision Date July 6, 2017

Since the USDA has moved to using only secure webpages, the address in the GG Updater must now point to a secure page as well. Because of this restriction, a new GRIN-Global Updater must first be installed before you can invoke the Updater.

Directions

1. Download & save the following file:

https://www.ars-grin.gov/~dbmuke/cgi-bin/gringlobal/1.9.8.2/GrinGlobal Updater Setup 1 9 7 1.msi

- 2. Rename the file to GrinGlobal_Updater_Setup.msi
- 3. Run the file if prompted, select Repair GRIN-Global Updater
- **4.** Also, after the new Updater is installed, when running it, change the "**Download From Server**" address to

https://www.ars-grin.gov/~dbmuke/cgi-bin/gringlobal/1.9.8.2/gui.asmx (see image below)

Dowr	iload From Server: https://www	.ars-grin.gov/~dbmu	ke/cgi-bin/gringlo	bal/1.9.8.2/gui.asr	nx v	Use Offline
	Component	Installed Version	Latest Version	Size (MB)	Status	
•	GRIN-Global Admin	(not installed)	1.9.7	2.86	Outdated	
•	GRIN-Global Database	(not installed)	1.9.8	3.13	Outdated
